

OTHERWISE KULLANIMI	
BAĞLAÇ	KELİME : THE OPPOSITE
1. The hypothesis must be tested thoroughly; otherwise, the results may be invalid.	1. A study claims that people are not independent of their choices. But, I must admit that I believe otherwise.
2. Students must cite all sources appropriately, otherwise, their work may be considered plagiarized.	2. Costly or otherwise. We have to devise a ne alternative to the existing plan.
3. The experiment should be replicated multiple times; otherwise, the data cannot be considered reliable.	
4. In the early 1900s, the Ottomans had to forge alliances with one of the fighting sides; otherwise, the empire would be left alone without allies.	
5. The variables must be clearly defined; otherwise, the findings could be misinterpreted.	
6. A control group in research is necessary, otherwise, the effects of the independent variable would be inaccurately determined.
